## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 71-89, drawn to a process for the preparation of an epiK5-N,O-oversulfate derivative.

Group II, claim(s) 90-126 and 132-134, drawn to an epiK5-N,O-oversulfate derivative and compositions comprising the same.

Group III, claim(s) 127-131, drawn to a process for the preparation of a LMW-epiK5-N-sulfate.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I and II is an epiK5-N-sulfate derivative.

Oreste et al. (US 2002/0062019, May 23, 2002) teach a C5-epimerized N,O-sulfate K5 glycosaminoglycan which is submitted to nitrous acid depolymerization [claim 37].

Therefore, the technical feature linking the inventions of groups I and II does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

The technical feature linking groups I and III is an epiK5-N-sulfate. Oreste et al. (US 2002/0062019, May 23, 2002) a process which includes preparation of a C5-

epimerized N-sulfate K5 [claim 17]. Therefore, the technical feature linking the inventions of groups I and III does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

Groups II and III do not share a technical feature. The products of Group II are N,O-oversulfate derivatives while the method of Group III is drawn to the production of compounds which are not O-sulfated.

Accordingly, groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
